PROFESSIONAL EXPERIENCE

Toshiba Global Commerce Solutions - Frisco, TX

Delivery & Program Manager, Groceries Professional Services | Mar 2024 - Jan 2026

- Directed enterprise client portfolios spanning consulting, implementation, and sustainment programs valued at approximately \$5 million to \$10 million, aligning scope, schedule, economics, and quality standards with customer outcomes.
- Led cross-functional delivery teams across Professional Services, Product, Engineering, and customer stakeholders, coordinating milestones, dependencies, risks, and escalations across complex workstreams.
- Strengthened portfolio governance through forecasting, margin management, and performance reporting, improving on-time delivery by approximately 30% and reducing program margin erosion by 20%.
- Developed Statements of Work, work plans, and estimates spanning requirements, development, testing, deployment, and third-party coordination to convert client goals into executable plans.
- Managed baseline schedules, risks, change control, and change enablement activities throughout delivery, securing alignment from internal leaders, partners, and customer stakeholders to keep programs on track.
- Built an integrated Smartsheet and Jira reporting structure that gave leaders real-time visibility into delivery health, budgets, milestones, requirements progress, and risks.
- Led status, financial, and delivery health reviews with executive, customer, and delivery stakeholders, accelerating escalation resolution and strengthening customer satisfaction across multiple programs.

NCR Voyix - Plano, TX

Global PMO Manager | Dec 2020 - Feb 2024

- Led NCR's 2023 cyber-attack recovery portfolio affecting 70,000 sites and 16 applications, coordinating Sales, Engineering, Product, and Professional Services teams through a high-visibility enterprise response.
- Achieved 98% service restoration, earning a Letter of Commendation from the President of NCR for delivery leadership, resilience, and cross-functional execution.
- Served as Professional Services Customer Satisfaction Champion for three consecutive years, raising scores from 91% to 95% to 98% through stronger governance and client communication.
- Governed a global PMO framework that improved portfolio consistency, compliance, prioritization discipline, and executive decision-making across enterprise client programs.
- Defined enterprise escalation, risk management, and communication protocols for high-severity issues, enabling faster decisions and clearer executive visibility across multiple workstreams.

- Developed centralized Smartsheet dashboards and governance routines that gave C-suite leaders real-time visibility into portfolio health, milestones, risks, and recovery status across global teams.

NCR - Plano, TX

Program/Project Manager | Nov 2016 - Nov 2020

- Managed implementation and rollout programs across five brands and more than 1,000 corporate and franchisee sites, driving execution across scope, cost, schedule, and customer delivery outcomes.
- Stabilized three at-risk enterprise clients by restoring governance, improving milestone tracking, and rebuilding stakeholder confidence across complex delivery workstreams.
- Directed multi-brand technology refresh programs supporting more than 1,000 sites from discovery and estimating through scheduling, deployment, user acceptance, and transition support.
- Optimized the bid review and estimation process, improving estimate accuracy by approximately 30% and strengthening resource planning, forecasting confidence, and implementation readiness.
- Supported scope clarification, implementation planning, and recovery efforts that strengthened client confidence and protected enterprise customer relationships.

NCR - Plano, TX

Quality and Engineering Manager, Systems Integration | Feb 2013 - Oct 2016

- Managed a team of 20 Quality Engineers supporting systems integration and enterprise transformation initiatives across sandbox, pre-production, and production environments.
- Led quality execution for a major Market Enterprise transformation program replacing 16 separate applications, ensuring readiness across design, lab validation, scheduling, risk management, and user acceptance activities.
- Established execution, defect triage, and escalation routines that strengthened status visibility, accelerated issue resolution, and improved progress tracking across multiple test environments.
- Integrated test design, business process documentation, and code delivery across a 16-application transformation program to reduce delays, improve dependency coordination, and strengthen requirements traceability.
- Built stakeholder confidence through consistent communication, reliable follow-through, and delivery against project commitments across a complex multi-environment program.

Texas Instruments - Dallas, TX

Product Engineer and Yield Champion, U.S. Wireless Group | Jan 2005 - Jan 2013

- Led yield improvement programs across production, coordinating resources, managing risks, and driving cross-functional execution across fabs and assembly and test sites.
- Implemented process and test corrective actions to improve product quality and reliability performance across high-volume manufacturing environments.
- Managed test program modifications for released production programs, offload, and verification activities, supporting yield improvement, customer return investigations, and corrective and preventive action closure.
- Identified root causes and implemented fab process changes that eliminated 40% low-temperature top-speed fallout and reduced multi-year e-fuse final test yield loss by 1.2%.
- Automated yield and performance trend reporting with Perl, SQL, JMP, and Spotfire, improving analysis speed and decision-making for engineering and operations leaders.

EDUCATION

Bachelor of Science in Electrical Engineering | University of Texas at Dallas - Richardson, TX

UT Post Graduate Program in AI Agents for Business Applications - Expected July 2026
